## **DETAILED ACTION**

### ***Response to Amendment***

1. Receipt is acknowledged of the Amendment filed February 13, 2004. The Amendment includes full responses to the minor informalities of claims identified in previous Office Action. The Amendment further includes newly submitted Abstract of the Disclosure.

### ***Allowable Subject Matter***

2. Claims 1-28 are allowed.

The following is an examiner's statement of reasons for allowance: none of the prior art of record discloses, teaches or fairly suggests the claimed method of reading a magnetic tag having at least one magnetic element, comprising, among other steps of, determining transition data associated with changes in the magnetization state of at least one magnetic element and determining the element direction which corresponds to the transition data for that element. One of the cited prior arts, Yamashita discloses an identification method using a magnetic tag, but lacks teachings of determining steps as claimed in the present application. Accordingly, one of ordinary skill in the art would not have been motivated to modify teachings of prior art to meet the claimed limitations as set forth in the present claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
